

Amendments to the Specification

Please replace the first sentence of paragraph 33 with the following replacement sentence:

The target like division of the platen delineates different sectors within a single cell, and the sectors are not identically defined depending on the type of cell to which they pertain. The cells aI, bI, cI, dI, eI, fI, gI, hI, are approximately triangular with the particularity of having an ~~areuate~~ accurate base; and the intersection of the two vertices is the point 0.

Please replace the last sentence of paragraph 42 with the following sentence:

Alternatively, ordering may occur for example by selecting features in order of their distance from the core or angular distance ~~form~~ from a predetermined core angle.
